

Upcoming Maytag Service School

C-PEC Service School

Please join us for our next C-PEC service school. Our next service school will be held on May 6th at our Phoenix office and May 7th at our Tucson office. We will cover the Maytag commercial top load washers including the latest model MAT14P-DAWW and MFR front load washers. Lunch will be provided at no charge and there is no charge to attend the class. Please RSVP to our office at 602-248-0808. If you have a specific machine you would like us to cover please mention it when you RSVP. We look forward to having you.

Maytag's Front Load Washers Cut Water Usage up to 44% With the Turbo Wash System

Maytag continues to lead the charge in reducing utility overhead. In addition to producing the industry's most gas efficient commercial dryers, Maytag has significantly reduced water consumption of multi-load front loading washers with the Turbo Wash System. The Turbo Wash System reduces water consumption by up to 44% compared to previous MFR models. In addition to water savings the washer also has advanced controls that allow the owner to customize wash cycles depending on the customers and circumstances of the store. The display can read in English or Spanish and has advanced marketing features like Time of Day Pricing, Super Cycle and Cycle Based Pricing. Please feel free to visit our office for a demonstration on the Maytag multi load washers.
