### Find Out What the Industry is Saying About Maytag's High-Efficiency Front Load Washer!

A recent lab test performed in an approved testing facility to the American Home Appliance Manufacturers (AHAM) HLW1-2006 laundry industry standard, concluded that the Maytag High-Efficiency washer model MAH22PDAWW achieves superior cleaning performance, while still providing outstanding energy savings. The MAH22PDAWW washer was the first commercial washer to achieve the CEE Tier III rating, the highest efficiency rating from the Consortium for Energy Efficiency. Maytag is committed to manufacturing the most energy efficient equipment in the commercial laundry industry backed by the industry's longest and most extensive warranty, 5 YEARS on ALL PARTS. Compared to for example the Huebsch front load washer HWFT71 the Maytag High-Efficiency uses 1.3 gallons less water on average per cycle, has an additional 2 years of parts warranty and has a larger inner tumbler volume. The Maytag High-Efficiency truly does set the standard in efficiency and durability.

### Free Commercial Laundry Service School is Well Attended

C-PEC recently held its semi-annual free service school at the C-PEC headquarters in Phoenix. The service school was well attended by coin laundry stores owners from across the state. Attendees learned about maintaining and repairing coin operated dryers, coin operated top loading and front loading washers. Lunch was provided for those who attended. Please contact C-PEC for dates of upcoming service schools.
