FIREFIGHTER'S PPE DRYING CABINET

FIREFIGHTER'S PPE DRYING CABINET

UniMac® has been recognized around the world as the leading manufacturer of commercial laundry equipment. We produce, sell and support more commercial washers and dryers in North America than any other company. The Firefighter's Personal Protective Equipment (PPE) Drying Cabinet provides fire stations the means to effectively, efficiently and safely dry protective gear—at the lowest cost of ownership in the industry.

SAFE GEAR HANDLING

Specifically designed to prevent wear and tear to your PPE, our drying cabinet uses a unique airflow system that circulates heated air in and around gear, providing safe, efficient drying, especially in hard-to-dry areas such as inseams.

FAST

The PPE Drying Cabinet offers preset programs that greatly reduce drying times, returning your gear to service quickly. The 105°F temperature of the cabinet is much faster than hanging gear in front of fans or a non-heated drying system and removes the risks of tumble drying.

VERSATILE

The unique, flexible rack design and hangers offer the capacity to dry six complete sets of gear at a time as well as other fire equipment like fire hoses. Each unit includes special drying racks for boots and gloves—a standard feature that can cost up to \$1,400 more with competing brands—along with optional drying shelves for racking.

LOWER UTILITY COSTS

We use a dual-sided airflow process and efficient blower system to force recirculated, heated air inside, upward and around the outside of your gear, ensuring that your PPE is thoroughly dried and keeping your utility costs low.

WORRY-FREE PERFORMANCE

For more than seven decades, UniMac laundry machines have set the industry standard for quality, durability and performance. Our complete one-year warranty is issued to the original purchaser of the PPE Drying Cabinet, labor not included.

ALLIANCE LAUNDRY SYSTEMS - SHEPARD ST, RIPON, WI 54971 - 1.800.587.5458**

Consult your UniMac distributor for details. For the most accurate information, the installation guide should be used for all design and construction purposes. Due to continuous product improvements, design and specifications subject to change without notice. The quality management systems at Alliance Laundry Systems' Ripon facility have been registered to ISO 9001:2008.

PPE DRYING CABINET – AT A GLANCE:

- Five programmable cycles
- Doors open at complete 180° angle
- Adjustable leveling legs
- Space for up to 15 boots/gloves
- Unique rack design for maximum water removal
- Electrostatically-applied paint for superior bonding and corrosion resistance
- 100% front-serviceable
- Optional utility shelf
- Contributes to compliance with NFPA 1851 guidelines

SPECIFICATIONS	PPE DRYING CABINET	
Capacity	6 Full Sets of Turnout Gear	
Electric Heating	12 kW 9 kW	
Electric Connection • Circuit Breaker	208 V - 50/60 Hz 1 - Ph • 60A Breaker	
	208 V - 50/60 Hz 3 - Ph • 35A Breaker	
	240 V - 50/60 Hz 1 - Ph • 70A Breaker	
	240 V - 50/60 Hz 3 - Ph • 40A Breaker	
Exhaust Diameter - in (mm)	6 (152)	
Outlet Airflow - cfm (m3/h)	300 (510)	
Width - in (mm)	Outer	61.13 (1553)
	Inner	53.94 (1370)
Depth - in (mm)	Outer	32.75 (832)
	Inner	29.19 (741)
Height - in (mm)	Outer	79.5 (2019)
	Inner	60 (1524)
